ARTHIK DWIVEDI

AI/ML ENGINEERING | PYTHON | SOFTWARE DEVELOPMENT

+91 8417996304 | arthikdwivedi07@gmail.com | Unnao, Uttar Pradesh, India

linkedin.com/in/arthik-dwivedi | github.com/ARTHIK22

PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) student with hands-on experience in developing AI-powered applications and machine learning solutions using Python. Experienced in building projects involving predictive modeling, data analysis, and intelligent application development. Familiar with machine learning libraries, software development, and system architecture fundamentals. Passionate about solving real-world problems through Artificial Intelligence, Machine Learning, and innovative software solutions

TECHNICAL SKILLS

Programming: Python, Java, JavaScript

AI / Machine Learning: Scikit-learn, Pandas, NumPy, data preprocessing, model training and evaluation, prompt engineering

Web / Application Development: HTML, CSS, JavaScript, Streamlit, FastAPI (project exposure)

Tools & Platforms: Git, GitHub, VS Code, n8n, Figma

Core Concepts: Data Structures and Algorithms, OOP, relational database design, software architecture, problem solving

Cloud: AWS architecture fundamentals

SELECTED PROJECTS

NeoEstate AI — Property Price Predictor | GitHub: github.com/ARTHIK22

- Built an AI-powered real-estate valuation application using a Random Forest model to estimate property prices from location, plot size, furnishing, condition, and parking inputs.
- Implemented local-market versus model-price comparison, feature-importance insights, a furnishing–condition matrix, and budget-fit detection.

Student Performance Clustering System | GitHub: github.com/ARTHIK22

- Developed an academic analytics project focused on grouping students by performance patterns using clustering; designed to support exploration of student data and performance trends.

AI-Powered Academic Project Evaluation Platform | GitHub: github.com/ARTHIK22

- Worked on an AI-focused platform concept for evaluating academic projects; emphasizes structured project assessment and AI-assisted review.

AI-Based Disease Prediction System

- Built a symptom-based disease prediction model using Python and Scikit-learn, including data preprocessing, model training, and evaluation.

EXPERIENCE

AIML Intern — OdNest EduTech Pvt. Ltd. | Nov 2025 – Jan 2026 | Remote

- Completed an AIML internship and associated training; received an outstanding-performance recognition and a Letter of Recommendation from OdNest.
- Applied analytical thinking, problem solving, and collaboration while working through program tasks.

EDUCATION

B.Tech, Computer Science & Engineering (Artificial Intelligence & Machine Learning) | 2024–2028

R.R. Institute of Modern Technology, AKTU

Intermediate, Subhash Inter College (60.2%) | 2024 • High School, R R D S Memorial Public School (77.67%) | 2022

CERTIFICATIONS & TRAINING

- • DigiCoders Technologies — Summer Training in Python–AI/ML, 45 days; Grade A++ (2026)
- • Forage — Walmart Global Tech Advanced Software Engineering Job Simulation
- • AWS Solutions Architecture Job Simulation
- • Tata Cybersecurity Analyst Job Simulation (2025)
- • LetsUpgrade — Prompt Engineering
- • AI Code Explainer Essentials Full-Stack Workshop
- • Figma Bootcamp
- • Automate Everything With n8n (2026)
- • be10x — AI Tools Workshop (2026)
- • TCS iON / IndiaAI — YUVA AI For All (2026)
- • GeeksforGeeks — Summer SkillUp participation
- • Build Your 2025 Winning Data Science Resume with AI (2026)
- • OdNest — AIML Training and Examination Completion (2026)

RECOGNITION

- OdNest Outstanding Performance Recognition and Letter of Recommendation (2026)
- CampusCrew 100K Milestone Honor recognizing contribution to a community reaching 100,000+ students worldwide (2026)
